The Devil's Crossroads

LOGLINE:

Assuming the role of demon hunters, guests travel to the Devil's crossroads in Transylvania to enter Hell and stop its evils. But upon seeing how many have tried and failed to do the same, they realize the true danger they are in and must find an escape – or fall prey to the same fate.

SYNOPSIS:

The crossroads near a Romani village in Transylvania is infamous in supernatural circles. For centuries, residents and travelers have gone missing at its crosshairs, purportedly lured in by the sound of the Devil's violin, never to be seen again. While the locals grieve, occultists and demon hunters from around the world flock to the area in an attempt to stop Hell from spreading to Earth.

You are one of those demon hunters. You've heard the stories, know that hundreds have attempted this before you and never returned. But that doesn't deter you. With your trusty sidekicks in tow, you find the legendary crossroads and violin and follow it below the surface, ready for whatever evils lie within.

You were wrong. You weren't ready for this: drapes of dead hunters, tortured and put on display, massacred by terrors you could never have imagined and that you now run from. Demons take a special interest to you, and you can't help but feel that the violins are playing a soundtrack to your own impending death.

Fame and triumph aren't your priorities anymore. Will you be able to escape from Hell and live to tell the crossroads tale?
